Project Summary- Provide a brief description of your project: For planning projects include a final deliverable.

Enhance the public safety capabilities of law enforcement agencies throughout the region by aggregating discrete criminal information sources into a unified platform. Without our regional system, there exists no active solution for connecting data across jurisdictions. The clues to solving a case are often outside an officer's home agency; we can make all that neighboring information easily available. Criminal activity crosses jurisdictional boundaries, so too should our ability to search and analyze data.

The outcome is to build and maintain a single search interface that spans the breadth of agencies willing to participate and contribute.

This field is limited to 750 characters.

For equipment projects, please provide an inventory of the requested item currently used in the county:

A portion of the funding will pay license/subscription fees to platforms that aggregate and share law enforcement information
